Eranakulam, Kerala

PROFILE

Flutter Developer with 6 months of internship experience in building cross-platform mobile applications using Flutter and Dart. Proficient in creating responsive UIs, integrating REST APIs, and implementing Firebase solutions, with hands-on experience in MVVM architecture and delivering seamless user experiences.

TECHNICAL SKILLS

Languages	: Dart
Framework	: Flutter
Backend & APIs	: Firebase, REST
API Architecture	: MVVM, MVC
State Management	: Provider, GetX, Bloc, Riverpod
Tools	: Android Studio, VS Code, Git, GitHub
Mobile Development	: Cross-Platform App Development (Android & iOS)
Deployment	: Google Play Store, Apple App Store

WORK EXPERIENCE

FLUTTER DEVELOPER INTERN | Luminar Technolab, Kochi Dec 2025-Current

- Developed two cross-platform mobile applications using MVVM architecture with REST APIs, Firebase, and SQLite for real-time data handling.
- Designed responsive UI for Android and iOS, while using Git for version control, code reviews, debugging, and issue resolution.

PROJECTS

Amazon Prime video Clone app | <https://github.com/nicyshai/prime-video>

- Developed an Amazon prime video clone app using Flutter and Dart with responsive UI for Android and iOS platforms.
- Built a Prime Video-style Flutter app with responsive UI and reusable widgets.
- Implemented Bottom Navigation Bar, Carousel Slider, and smooth screen navigation for an enhanced user experience.
- Integrated video streaming functionality and built reusable widgets for scalable development.
